## EDUCATION

---

**St. Francis Institute Of Technology, Mumbai, India**  
*Bachelors of Engineering (B.E) in Information Technology*

January 2021 - May 2024  
CGPA - 9/10

## TECHNICAL SKILLS

---

**Programming Languages:** Python, JavaScript, Java, Nodejs **Databases:** PostgreSQL, Redis, Firebase, MongoDB  
**Framework and Tools:** Django, Tailwind, React, Springboot, Gin(basic), Git, Docker, AWS, GCP

## WORK EXPERIENCE

---

### Software Engineer Intern

January 2024 - Current

*BharatNXT(Fintech), Mumbai, India*

- Involved in the development and maintenance of Payment service, multiple services within a microservices architecture.
- Implemented APIs for Flutter, Angular frontend and used SQL to generate cross-team reports, enabling data-driven decision-making and enhancing operational efficiency.
- Tech Stack - Java, Spring Boot, PostgreSQL, Firebase, Kafka

### Python Developer Intern

May 2023 - August 2023

*Rentokil-PCI, Mumbai, India*

- Developed a Django web app enabling over 4000 employees to conveniently claim their Leave Travel Allowance, collaborating closely with HR, Finance, and cross-functional teams to ensure alignment with intricate policies and business requirements
- Automated the LTC redemption process, resulting in a significant reduction in administrative workload and a notable enhancement in organizational efficiency
- Techstack - Django, PostgreSQL, Docker, Google Compute Engine, Google Cloud Run, Cloud SQL

## PROJECTS

---

### CodeAlong [Link](#)

September 2023 - Current

- Developed CodeAlong, a web application with real-time code collaborative editing and integrated video call functionality, enhancing collaborative programming experiences and deployed on Render.
- Deployed Judge0 Docker Container on Amazon EC2 instance to serve as the backend code execution service for CodeAlong, facilitating seamless code execution and output retrieval, with support for 21 programming languages and 60+ themes.
- Techstack: React(Vite), Nodejs, Socket.io, Zegocloud SDK, AWS EC2, Docker, Redis, PostgreSQL, Render

### Leetcode Contest Enhancer Extension

February 2023 - August 2023

- Enhanced LeetCode website contest pages with a Chrome extension, providing language insights and improving user contest experience.
- Developed a robust Backend API using Django, PostgreSQL, and Redis for efficient data management, caching, and rate limiting. Dockerized and deployed on Google Cloud Run for high availability and scalability.
- Techstack : JavaScript, Chrome APIs, Django, Supabase PostgreSQL, Redis, Docker, DockerHub, Google Cloud Run

### Netflix-TMDB Clone [Link](#)

March 2023 - March 2023

- Developed a Netflix-based clone website using React, Redux, Material UI, Alan AI, and TMDB API, offering users the ability to browse, search, view movie and cast details, add favorite and watchlist movies and as well as navigate the site using voice-based controls powered by Alan AI and deployed on Netlify
- Techstack : React, NodeJS, Alan AI SDK, Redux, Material-UI, Netlify.

## PROBLEM SOLVING

---

- **Leetcode** - Solved 550+ Problems on Leetcode with rating of 1481 in 17+ contests. [Leetcode Profile](#)
- **Codechef** - 2 Star, Solved 140+ Problems with rating of 1418 in 12 contests. [Codechef Profile](#)
- **GeeksForGeeks** - Solved 80+ DSA Problems. [GFG Profile](#)
- **Codeforces** - Solved 25+ Problems with contest rating of 1017. [Codeforces Profile](#)

## CERTIFICATIONS

---

- Certified Redis Developer [Link](#)
- Oracle OCI Cloud Foundations Associate [Link](#)
- Redis-RU101 Redis Data Structures, RU102JS Javascript Developer, RU202 Redis Streams [Link](#)
- The Complete 2022 Web Development Bootcamp [Link](#)
- 100 Days of Code: The Complete Python Pro Bootcamp [Link](#)
